This command creates compressed archive files of executable files with .rar extension.. " cmake .. make --release " make clean && make install sudo mklink -p /opt/cman/bin/clang.. ./run /bin/crack cd keygod Crackkeygod uses Rar and Zip archives, and a few other formats that most Linux users can easily detect as these should provide good compression. In addition it is very handy if you are using a DVD player that will not let you connect your USB drive, because it cannot decompress the contents with rar or zip:..
